Tested Storage Product Description

NetApp EF570 all flash system is a 4th generation all-flash array designed specifically for performance-intensive workloads such as big data analytics, technical computing and video surveillance. With extremely high throughput, and low latencies, the EF570 is designed to increase application responsiveness and accelerate modern enterprise applications. The system supports 367TB of raw flash capacity in a modular 2U building block that scales to 1.8PB

The EF570 also supports multiple high-speed host interfaces including a new 100Gb NVMe-over-InfiniBand – one of the first enterprise-class arrays with support for NVMe. SANtricity System Manager gives customers the flexibility to manage their NetApp EF570 systems wherever they are at all times through an easy-to-use, on-box, web-based interface. SANtricity Cloud Connector enables NetApp Data Fabric, or Hybrid Cloud capabilities, by providing cost-effective backup and recovery to the cloud.

NetApp E-Series arrays have a rich, 20+ year legacy of providing industry leading price/performance, value and reliability, with over 1 million systems installed.
